

Product Description

DISPER-SUL[®] Plus Micro-Granular with Trisperse is a 90% degradable granular sulfur that is made with Trisperse (a special formulation of bentonite clay and wetting agents). Trisperse reliably breaks DISPER-SUL[®] Down into “micro sulfur” in all normal soil conditions. This assures you the DISPER-SUL[®] you apply today will become available plant food within the growing season.

Micro-Granular

Is a granular degradable sulfur in the -10 +20 mesh range. The smaller size particle makes this product great for fertilizer blends for turf use, where particle size is an issue (ex. golf greens, golf tees, and fairways).

Guaranteed Analysis

(0-0-0-90)	90% Sulfur
	10% Bentonites*

*dispersible clay

Physical Properties

Assay	90% S Minimum
Color:	Yellow-gray
Bulk Density	65 – 68 lbs/ft ³
Size Guide Number	129 Typical
Sieve Analysis	-10 + 20 Nominal

Packaging

50 lbs. Bags– 40 or 55 per pallet on new pallets with slip sheets, stretch wrapped
2000 lbs. Bags– new one-way superbag
Bulk- Truck or Rail

Production Facility

Odessa Plant
14001 West Murphy
Odessa, TX 79763
