

Product Description

DISPER-SUL[®] Plus with Trisperse

Martin Resources produces DISPER-SUL[®] Plus with Trisperse (a wetting, suspending, and swelling agent) as granular product for garden, turf and agricultural applications. The unique combinations provide a greater opportunity for nutrient uptake.

DISPER-SUL[®] Plus Iron provides sulfur and iron for enhanced formation of chlorophyll in plants. The combination of elemental sulfur and iron create a unique micro environment within the soil for enhanced iron availability.

DISPER-SUL[®] Plus Manganese provides sulfur and manganese. Manganese plays an important roll in activating certain enzymes involved in fatty acid synthesis and nucleotide synthesis.

DISPER-SUL[®] Plus Manganese & Iron provides uniform distribution of both iron and manganese. By applying iron and manganese with elemental sulfur, it assures greater iron and manganese availability. Sulfur acidifies the area around the micronutrient release, thus providing a lower pH environment for increased nutrient up-take.

Physical Properties

Product Name	Product Form	Analysis			Color	Size Guide #	Bulk Density	Sieve Analysis	Production Point
		80%S	3.5% Fe	1.5% Mn					
Disper-Sul 80% Plus Iron & Manganese	Granular	80%S	3.5% Fe	1.5% Mn	Dk.Gray Brown	270 Typical	65-70 lbs/ft3	-6 +16 Nominal	OdessaTX,
Disper-Sul 80% Plus Iron	Granular	80%S	5.0% Fe		Dk.Gray Brown	270 Typical	65-70 lbs/ft3	-6 +16 Nominal	OdessaTX,
Disper-Sul 80% Plus Manganese	Granular	80%S		5.0% Mn	Dk.Gray Brown	270 Typical	65-70 lbs/ft3	-6 +16 Nominal	OdessaTX,

Packaging

50 lbs. Bags– 40 or 55 per pallet on new pallets with slip sheets, stretch wrapped

2000 lbs. Bags– new one-way superbags on new pallet with slip sheet

Bulk- Truck or Rail

Production Facility

Odessa Plant
14001 West Murphy
Odessa, TX 79763
